

## GORILLA GLUE 4 (ORIGINAL GLUE)

The Original Glue (GG4), developed by GG Strains, is a potent hybrid strain that delivers heavy-handed **euphoria and relaxation**, leaving you feeling “glued” to the couch. Its chunky, resin-covered buds fill the room with **pungent earthy and sour aromas** inherited from its parent strains, Chem’s Sister, Sour Dubb, and Chocolate Diesel. Taking first place in both the Michigan and Los Angeles 2014 Cannabis Cups as well as the High Times Jamaican World Cup, this multiple award-winning hybrid’s supremacy is no longer a secret, and consumers will search far and wide to get their hands sticky with The Original Glue GG4 / Formerly known as Gorilla Glue #4. ~ Leafly.com

**FKA:** Gorilla Glue 4

**Lineage:** Sour Dubb x Chem Sis x Chocolate Diesel

**Breeders:** Joesy Whales, Lone Watty founders of GG Strains

**Average THC Range:** 27-30%

**Hybrid:** Indica Dominant 63% Indica 37% Sativa

**Form:** Cup Winning Clone Only

- GG4 a fast vegging hybrid.
- Flowers between 58 days and 63 days.
- High yield – Indoor/Outdoor
- Top Shelf Product
- Very high THC content.
- Great Aroma / Pinny. chocolate, diesel taste. Very potent!
- Multiple High Times Cup Winner.

### **MEDICAL USE:**

- Anxiety
- PTSD

- Sleep/Insomnia
- Pain Relief

Okay, so the story behind Gorilla Glue strains isn't as animated as other strains. But it's compelling nevertheless. In like manner of the majority of strains out there, Gorilla Glue has many types. Its name was inspired by the **sticky-ickiness of its trichomes**. Well, that and the fact that it is rather difficult to cut with scissors, which often stay glued together during the trimming process. As for how the strains came about, now that is a story worth telling. In fact, you could call it a blessing in disguise.

It all started with **breeder Josey Wales**, who discarded the original seeds out of frustration after ruining his entire first crop. But lucky for you and the rest of the world, his buddy was able to get his hands on some of the leftovers and decided to grow them on his own a year later. Up came four different phenotypes, **but #4 was deemed the cream of the crop**. Ever since then, Gorilla Glue strains have been winning awards left and right, including the **High Times Jamaican World Cup**.

Today, Gorilla Glue strains remain some of the most favored medical strains in the world. From relaxation to pain relief, their effectiveness to heal cannot be denied. And their earthy, sour aromas, well, they're to die for, especially since they offer a hint of fresh pine as well. They have their parents **Sour Dubb, Chocolate Diesel, and Chem's Sister** to thank for that.

No matter the event, Gorilla Glue strains are excellent accompaniments. But do beware, they will kick you right in the tuchus, so proceed with caution.

\*Included with the IP package

She holds a higher potency than most indicas around. With a THC content as low as 24% and as high as 30%, she's perfect to use medicinally, especially if you suffer from chronic pain.

When Gorilla Glue isn't busy helping you relax, this indica hybrid will knock your socks off with its uplifting effects. As for the flowering time, that ranges **between 8-9 weeks**.
